Survey Motivation and Design

The purpose of the European Business in Korea: Business Confidence Survey is to take an annual snapshot of European companies' perceptions, successes and challenges in Korea, the first survey of which was conducted in 2014.

With consistency was one of the key factors that guided the questionnaire’s design and data analysis, an online survey platform akin to that of the previous years was set up for participating companies. The gathering of such replicable data was done in order to trace and understand the development of company strategies and perceptions year-on-year. However, as not all of the participants answered all of the questions, the total number of respondents are noted above each graph. A detailed breakdown of the survey’s participants’ profile can be found in the appendix.

The core team who worked to publish this survey comprised of four European chambers in Korea:

- European Chamber of Commerce in Korea as the initiator,
- British Chamber of Commerce in Korea,
- French Korean Chamber of Commerce and Industry,
- Korean-German Chamber of Commerce and Industry.

These Chambers, in partnership with the Seoul office of Roland Berger, worked together to publish this report.

In addition to the core team, the Belgian-Korean Business Forum, the Finland Chamber of Commerce and Industry in Korea, the Italian Chamber of Commerce in Korea, the Norwegian Business Association, the Spanish Chamber of Commerce in Korea, the Swedish Chamber of Commerce in Korea, and the Swiss-Korean Business Council supported the survey by distributing the questionnaire to their respective member.

About Roland Berger

Roland Berger, founded in 1967, is the only leading global consultancy of German heritage and European origin. With 2,400 employees working in 36 countries, we have successful operations in all major international markets. Our 50 offices are located in the key global business hubs. Roland Berger Seoul office was founded in August 2012. The Seoul office is serving both Korean and international companies based in Korea for domestic and global strategic issues in cooperation with other Roland Berger offices around the world.

Roland Berger advises major international industry and service companies as well as public institutions. Our services cover the entire range of management consulting from strategic advice to successful implementation: e.g. new leadership and business models; innovative processes and services; M&A, private equity and restructuring; and management support on large infrastructure projects.

Our firm is owned solely by a group of 220 partners. We share the conviction that the firm's independence provides the basis for unbiased advice to our clients.

At Roland Berger, we combine sound analyses with creative strategies that generate real and sustainable value for the client. We develop and consolidate our expertise in global Competence Centers that focus on specific industries and functional issues. We handpick interdisciplinary teams from these Competence Centers to develop the best solutions.

Executive Summary

The year 2020 has been heavily impacted by the COVID-19 pandemic. The impact of measures to contain the virus in Korea could be evaluated as rather mild. Although companies moved to a huge degree to remote working operations, Korea never experienced any kind of lock-down unlike many other countries. The concerns rather came from the disruption of supply chains, decreasing demand in export markets.

In fact, trade between the European Union, European Free Trade Association, the United Kingdom and Korea overall increased. Export from Europe to Korea amounted to USD 63.7 billion which was USD 3.6 billion or 6.0% more than in 2019; exports from Korea to Europe decreased but only slightly by 1.6% from USD 55.3 billion to USD 54.4 billion.

127 executives of European corporations participated in the Business Confidence Survey 2020. Those companies represent a workforce of 47,000 employees and a turnover of EUR 49.6 billion or KRW 65.0 trillion.

European companies operating in Korea in general were content with the business performance achieved in 2020; 63% of responding company’s CEOs were either very content or content and only 12% replied discontent. 44% of corporations replied an increase in turnover at least by 5% but 34% of companies experienced a substantial decrease by 5% or more. Profitability could be ensured by even more companies as 72% reported a positive EBIT (Earnings Before Interest and Tax), 12% replied break even and only 16% reported a negative EBIT. Profitability in some cases only could be ensured by reducing the workforce as observed at 32% companies. The outlook for business development is positive and therefore, 40% of companies intend to hire additional staff in 2021 and 48% to keep the current workforce on board.

In general, it can be stated that Korea as a market became more important in European companies’ global strategy as stated by 51% of respondents of the survey. This positive feedback clearly indicates that Korea, its companies and its consumers are and will remain an important partner respectively market for European companies. Accordingly, a considerable number of companies is planning to further expand their presence here.

Despite that business at many companies developed positively, there is still a high need to improve the business landscape such as in labour relations and labour costs. In fact, doing business in Korea has become more difficult over the last two years as stated by 63% of company representatives. Reforms initiated in 2020 and expected to be initiated in 2021 are not seen very beneficial for the majority of companies. The areas where the highest need for a thorough reform is seen are “legislative environment and regulations” (62% of respondents being dissatisfied with the current state of play), “discretionary enforcement of regulations” (58%), “openness of Korean market to foreign goods and services, lack of market access barriers” (48%) as less need to improve is seen at “tax rates / tax procedures / tax audits (38%) or “custom procedures / custom audits” (32%). Same as in previous years, about half of the respondents replied a need for change regarding non-discriminatory treatment of foreign enterprises.

Businesspeople are in general more positive than not when it comes to conducting business in the current COVID-19 environment: 45% expect a better business environment in 2021. 15% of companies expecting to have recovered fully business wise from COVID-19 during the first two quarters of 2021 and other 53% expect to have reached this during the second half of the year.

The challenges ahead for Korea, and all industry players both domestic and foreign, are considerable. The European business community hopes that the Business Confidence Survey will be a useful tool for businesspeople and policy makers to make future-forward decisions for the mutual benefit of the Korean society, the Korean economy, and European and Korean businesses.
Respondent Profile
Respondent Profile

How long has your company been operating in Korea?

The majority of companies responding to the survey has been in Korea for a considerable period of time. Almost 80% of the respondents replied that they have been operating in Korea more than 10 years and 12% of the companies have been operating for more than 5 years. On the other hand, 9% of companies participating in this survey have been active in the Korean market 5 years or less.

72% of European companies generated a positive EBIT, 12% broke even and 16% reported a negative EBIT.

How did the EBIT margin Korea compare to your company's worldwide margins in 2019?

31% of participating companies did better in terms of profitability than their group average, 40% were in line with their peers, and 30% failed to reach the group's profitability average.
How was your company’s EBIT margin in Korea for 2020 compared to 2019 results?

The EBIT margin in 2020 improved versus 2019 for 40% of European companies. 26% said EBIT margin remained about the same whereas, 35% replied they experienced a decrease in EBIT margin.
HR / Labour
How do you perceive the labour environment parameters in your specific business in Korea?

Labour costs but also labour relations are still seen as an area of concern for European companies. In fact, 41% of company representatives express their dissatisfaction with labour costs and labour relations; 42% have a rather neutral view but only 15% evaluate labour costs and relations as positive.
What has happened to the number of permanent positions in your company in Korea in 2020?

An increased number of European companies reduced permanent positions (32% in 2020 versus 19% in 2019) although the majority either kept the workforce stable (46%) or even increased (27%).

How do you expect the number of permanent positions in Korea to evolve over the next two years?

The majority of European companies are expecting to either keep their workforce (48%) or to increase them (40%) as only 12% foresee a reduction of employees.
What was the level of your staff turnover in Korea in 2020?

The level of staff turnover has been very low; 90% of companies reported a staff turnover of less than 20%.
How has doing business in Korea for your company developed over the last 2 years?

The majority of respondents (63%) have replied that business situation has become more difficult over the past two years, as 28% view the situation more neutral and 9% have a positive stance.
The majority of respondents (46%) is of the opinion that business reforms in 2020 have not been helpful; 34% responded that they are not sure and 20% stated that those reforms were supportive for their business.

The outlook for 2021 looks similar although there is less optimism but mor skepticism as well as uncertainty.
How do you perceive the following market parameters in your specific business in Korea?

Respondents perceive the potential for economic growth and capacity for innovation to be satisfactory for their industry in Korea.
How do you perceive the following market parameters in your specific business in Korea?

European companies evaluate especially the legislative environment and regulations, the discretionary enforcement of regulations as non-satisfactory. Administrative Issues and the transparency policymaking fares a bit better but still far from being evaluated positively. The only parameter here with a certain positive perception is Immigration uses.
Company representatives have a certain concern about free market access for foreign products as 48% express a non-positive view on that. With respect to custom procedures / custom audits and tax rates, tax procedures / tax audits a bigger share of responding companies have a more neutral or even positive view – although the ratio of negative evaluation of 32% and 38%, respectively cannot be easily neglected.
Do you perceive any unfair or unfavourable handling of foreign companies in Korea by the Korean government?

The issue of unfavorable handling of foreign companies has not been improved in 2020; it remains more or less on a similar level as in previous years.
Within your business sector, how have government policies relevant to foreign companies’ business environment changed over the past two years?

How do you perceive government policies relevant to foreign companies’ business environment will change over the next two years?

The majority of European companies stated that government policies have been as fair as they were two years ago and perceives it will be as fair as now over the next two years. About one third of companies believe that Korean government policies regarding foreign companies’ business environment have been and will be discriminatory against foreign companies.
COVID-19
What are the difficulties in business planning for 2021?

- Resurgence of COVID-19, 52%
- Labor policy burden, 22%
- High degree of global trade uncertainty, 18%
- Other, 5%
- Financial risks, 2%
- Raw material risks, 2%

What are your expected conditions for the global economy for 2021?

- Better, 45%
- Same, 32%
- Worse, 23%

Business planning and executing naturally has become more difficult in 2021; more than half (52%) state that a resurgence of COVID-19 will be present the biggest challenge followed by labour policy (22%) and uncertainty in global trade (18%).

The outlook for 2021 is a bit mixed with 45% being positive and 23% being negative.
When do you expect for your organization/industry to recover from the novel coronavirus outbreak?

Most respondents expect businesses and industry to recover from COVID-19 either in Q4/2021 or after 2021.
